

Project Type: Web copy

Details: This is high-level overview of organization's portfolio of products for a main line of business.

Excerpt:

You're likely familiar with Compuware's tools for the mainframe—[Abend-AID](#), [File-AID](#), [Hiperstation](#), [Strobe](#) and [Xpediter](#). These industry-standard tools have helped developers and testers improve their productivity for over 30 years. But did you know that Compuware is also uniquely positioned to help your organization get the strategic information that is key to making better business decisions?

Compuware is committed to the mainframe platform, with continual investment in research and development to keep our products current and meet today's challenges. In addition to our products, we also provide specialized services and best practices. These factors, combined with our world-class support results in many customer successes as evidenced by our 95% retention rate.

Compuware is continuing to evolve our mainframe solutions to address your biggest IT challenges: cost management, business compliance, quality compliance and competitive edge.

Our approach is unique in the industry:

Unique account management model:
Compuware provides customized support to each account to help you maximize your IT investment.

Integrated IT management:
While we continue to offer products and solutions that maximize programmer productivity, our capabilities have extended to provide IT management across the lifecycle.
